

## NL-RVS

Machine revision of main functional components  
(reconditioning and/or replacement of key mechanical and electronic components)

The machine revision consists in the functional reconditioning and replacement of key mechanical and electronic components. The lubrication systems of the moving parts will be cleaned and the activities include both a resumption or the repainting of the oxidized ones and a recalibration of the system. For the electronic part, the components for the management and control of the machine will be repla-

ced. Numerical Control, PC with Win 10 operating system, cables, axis motors, input / output module and front panel. The latest HMI version of the Newlast software with .FRV file compatibility will be installed and it will be compatible with the Industry 4.0 OPTIONAL module for bidirectional communication with the machine.
